How to Make Python Environment

Video

https://www.youtube.com/watch?v=KxvKCSwlUv8&t=595s

Steps

1. In the terminal, go into the project folder.

```
chdir my-project
```

2. Find the path to the version of python you want to use.

```
C:\Users\joshu\AppData\Local\Programs\Python\Python311\python.exe
```

3. Create the environment.

```
C:\Users\joshu\AppData\Local\Programs\Python\Python311\python.exe -m venv .venv
```

4. Activate it.

```
C:\Users\joshu>.venv\Scripts\activate.bat
```

5. Check Python version.

```
python -V
```

6. Install libraries.

```
pip install flask
```

7. Make 'requirments.txt'.

```
flask
requests>=1.1.2,<2.0
```
